

1                    ABSTRACT OF THE DISCLOSURE

2

3                    A fastener and a fastener assembly for fastening a

4 plurality of layered goods or for attaching a tag to a good has at least

5 one bulged massive portion provided at one end of a filament portion

6 instead of a conventional T-bar end. A fastener attaching device

7 shoots the fastener of the present invention through the goods to

8 attach the fasteners.
